ULTRACICLISMO

GUIDES · MOUNTAIN

From GPX to screen

Load it, test it offline, stop it rerouting.

Step by step

1
Official GPX
From the organisers. Latest version.

2
Check it
Track, direction and distance.

3
Import it
Connect, Wahoo app, Dashboard or app.

4
Send it
Sync and find it in the list.

5
Offline maps
Whole area, start and return.

6
Test in flight mode
Map and route open.

7
Rerouting
Turn it off if the rules require the track.

8
Plan B
Copy on phone. Battery for 112.

Before you go

- [ ] Official GPX checked
- [ ] Route on GPS and phone
- [ ] Offline maps downloaded
- [ ] Tested with no signal
- [ ] Rerouting set per rules
- [ ] Power bank and cable
- [ ] Water and checkpoints noted

Battery

You reach the next plug with margin
Navigate as usual, charge at every stop

You will only just reach the next plug
Save: low brightness, screen off, flight mode with GPS

You won't make it or the phone is your only phone
Use the bike GPS or paper; save the phone for 112

Formats and what they are for

FORMAT	WHAT IT IS	USE IT FOR
GPX track (trk)	Faithful line of the course	Following a route or race
GPX route (rte)	Few points; device calculates	Simple routes; may deviate
Waypoints (wpt)	Single named points	Water, checkpoints, beds
FIT / TCX	Training formats	Garmin, Wahoo, komoot accept them
KML / KMZ	Google Earth format	OsmAnd, Organic Maps; not komoot

Menus change with every update: check the official help. Emergencies: 112. Sources: Garmin, Wahoo, Hammerhead, komoot, OsmAnd, Wikiloc, Organic Maps.
